Research
StBoT 73: genre and style clusters
Question: where do the orphans belong?
Define traditions from the literature
Test on texts of known origin
Place orphans, or abstain
Read the results as QTM
Pipeline
1 Corpus
TLHdig 0.3, normalised words and signs per manuscript.
3,378 reference manuscripts; 2,899 orphans (CTH 470, EBo).
2 Reference
10 traditions, each defined by a published study and mapped to Laroche's CTH.
Unclaimed CTH ranges kept as residue.
3 Features
tf-idf of word forms (what is written) and of sign n-grams within words (how).
Each word tagged with a word class.
4 Score
Cosine to each tradition's centroid.
margin = $s_1 - s_2$, the lead of the nearest over the runner-up.
5 Decide
Assign if margin ≥ 0.018 (80% precision on held-out windows), else abstain.
Outside genres as classes.
6 Output
847 of 2,026 orphans placed.
Each placement with its margin split by word class and layer, for checking on the tablet.
Validation
Composition held out
57 of 78 return to their group
Contested claim
Ambazzi: Arzawa ranks 8 of 10
Layers, classes
spelling adds 61%→62%
Manuscript held out
84%; majority 30%
CTH 701 subgroups
57%; majority 21%
Fragment size
10 words: 65%
40 words: 78%
Open set
outside genres placed 23%–33%
Decision split
common words: 11% of the margin
